## Featured Speaker For February

Do you know how the new Tax Cuts and Jobs Act will affect your business? Are there some benefits? Do you have a strategy?

Jay Lang will discuss the new Tax Cuts and Jobs Act and how it will affect your personal tax return and business tax return including the new Business Income Section 199A. Section 199A is the new 20% deduction of Qualified Business Income (QBI) from pass-through entities including Sole Proprietorships that your business will benefit.

Jay is an Enrolled Agent, Staff Accountant and Business Consultant at Cramer & Associates Accountancy Corporation in Rocklin, with 25 years of experience in accounting and bookkeeping. He supports a wide array of businesses in navigating their companies through numerous reporting, bookkeeping and tax requirements. He is a Certified ProAdvisor on QuickBooks Accounting, has experience in multiple accounting software programs and is a Director with the local Sacramento Valley Chapter of Enrolled Agents. Jay received his BS in Business Administration with an emphasis in Accounting from Humboldt State University.

# A Message From Santa

## Santa is Exhausted!

Just like most of you, Santa is exhausted from the busy holiday season. And, also like most of you, he is looking forward to the pool season. But, more importantly, he is looking forward to when he can get-away in September for a well-deserved rest and has started making plans.

He has reserved a different camping site at Sly Park for September 14-16, 2018. Those of you who attended last year (or were unable to attend in some cases) know that some of Santa's elves got some bad info and we were not able to accommodate all the RVs of Santa's camping friends. Good news! We have changed from Site 5 to Site 3 and will have room for at least 12 RVs (yes, guaranteed!) Though not site specific, reservations for those sites will be taken on a first registered, first reserved basis.

Registration will begin at the May tabletop and registration forms will be available through the newsletter and at the [cvipssa.com](http://cvipssa.com) website beginning in May also.

Santa is looking for a few more elves to help out. You do not have to commit to the whole weekend, but if you would be willing to help out with just one meal, or some other portion of the fun (crafts, campfire, entertainment, or something else), you are most welcome to join the other elves in making sure everyone has a great time. We have a few planning meetings prior to the event and not only do we have fun at those meetings, we feed you, too. Please call Jack Emlay at [530-644-7750](tel:530-644-7750) if you are interested.

Look forward to seeing you there.

His loyal elves

## Pentair Education Fund

In agreement with Pentair, a Pentair education fund has been established for CVIPSSA members. Twenty-five percent (25%) of the annual rebates given to our chapter by Pentair will be set aside to reimburse our members for Pentair training fees/tuition. The maximum amount to be set aside is \$1,000 per year. If the reimbursement requests exceed the education fund amount, then the fund amount will be split amongst the members that applied for reimbursement. Reimbursement requests must be made by January 31 for prior year training fees. Reimbursements will be made at the April chapter meeting.

### A Message from Monte...

#### The Phantom Leak

Occasionally, American Leak Detection Sacramento is called out to find a pool leak but...it isn't a leak at all. There are times that the auto-fill canister float isn't set correctly, which results in water being constantly added to a pool. Capital Valley IPSSA members know as well as anyone that when water is constantly added to a pool, the chemicals get diluted and makes the pool appear to have a leak. Obviously, if the auto-fill supply line is turned off and the water level drops (exceeding regular evaporation) there is a leak and a leak detection appointment should be scheduled. But, if the auto supply line is shut and there is no water loss, an adjustment to the float could be in order. Also, overflow pipes can also be set incorrectly in the auto fill canister, allowing water to leak down lower than is necessary. Overflow lines that are set below the water line on the pool wall, and have an anti-siphon loop in the pipe, can sometimes fail to break the siphon and continue to lower the level of the pool. This scenario is more likely to occur if there is a intense rainstorm and the water level in the pool rises very quickly, not allowing the anti siphon loop to work correctly.

## New Pool Safety Laws

The Swimming Pool Safety Act was updated by SB 442, effective January 1, 2018. This affects anyone who pulls a permit to build or remodel a pool or spa, and any pool that is part of a home for sale.

This is a summary of the changes to the Swimming Pool Safety Act:

- Increases the number of safety or anti-drowning features required on new or remodeled residential swimming pools from one to two, and also extends that standard throughout the state.
- Revises the characteristics of some of those safety features.
- Repeals the exemption in existing law for pools in jurisdictions that adopt more stringent swimming pool safety standards.
- Requires that whenever there is an inspection of a property in connection with the transfer of that property, the inspection must also include the swimming pool or spa. This inspection is to be noninvasive and requires the inspector to disclose whether or not the pool or spa has been equipped with two of the seven required safety devices.

Please refer to Business and Professions Code §7195 and to Health and Safety Code §§115922 and 115925 for the full content of the law.

## Sick Route

Thank you for your continued support and servicing assigned pools!

## **POOLCORP Acquires Chem Quip**

POOLCORP announced its acquisition of the assets of Chem Quip as of December 29, 2017.

Chem Quip is a Sacramento-based distributor of equipment, chemicals and supplies to residential and commercial swimming pool customers; it operates five sales and distribution centers located in Northern and Central California.

“Chem Quip has been a strong presence in the Northern California swimming pool industry for over 55 years,” said POOLCORP President and CEO Manny Perez de la Mesa in a press release. “Adding the Chem Quip team and sales locations to the POOLCORP network strengthens our ability to serve customers in the important East San Francisco Bay and Northern California markets...”

POOLCORP operates 346 sales centers in North America, Europe, South America, and Australia.

## **Conditioner Prices Likely to Rise Significantly...**

This is according to a couple of industry publications. China, where most cyanuric acid (CYA) is produced, has implemented tighter environmental regulations, that has contributed to chemical plants being closed. As a result, manufacturers of dichlor, trichlor and other products with CYA were hit with substantial price increases last year. These price increases are expected to be passed on to distributors and retailers. We'll just have to wait and see when and by how much.

## **PG&E Pump Rebates**

All paper or online applications for 2017 must be postmarked or received by 3/1/18.

## **Arrow Insurance to Offer Business Interruption Coverage**

The purpose of this coverage is to reimburse each member for the loss that they sustain due to not being able to service pools in areas that may suffer a disaster. Although the details are preliminary, it is expected the coverage will be exclusive to IPSSA, will be effective April 1, 2018, cover up to \$25,000, and for little or no additional cost.

## **SMUD Pool Pump Rebates in 2018**

SMUD continues the \$350 rebate on ENERGY STAR variable-speed pool pumps.

SMUD's 2018 application will include a new payment release authorization that will allow the customer to sign over their rebate to the installer.
