Reliable LeakVue™ Services

LeakVue™ is a cutting-edge device that allows you to evaluate water loss in your pool, spa, or fountain in as little as 15 minutes. The specialists at American Leak Detection™ prefer this device for its simplicity, speed, and accuracy.

The LeakVue™ system works by using a laser sensor to detect any changes in the water's surface. It then sends its findings wirelessly to a PDA that displays a graph of rises and falls in your pool's water level. Our trained interpreter evaluates the results and determines whether or not changes in the water come from a leak or natural environmental factors. If we do find a leak, our skilled technicians will provide you an estimate on repairs and, in many cases, can begin repairs that same day.

American Leak Detection™ and PlainSight partnered to create LeakVue™, making it a patented product exclusive to our company. The easy-to-use device allows us to cut down on the capital needed to perform leak tests and pass those savings onto you. This is a service you cannot find at any of our competitors.
