October 4, 2017
Contractors State License Board
November 1, 2017

Featured Speaker For The Month Of September

Founded in 1983 in Piru, CA, United Chemical introduced the first sodium bromide based algicide to the industry. In 1994, we became the first sodium bromide based algicide registered by the EPA. Our company's focus is on rescue and prevention of stains and algae. I will be talking about how to maintain a trouble-free pool with less chemicals and lower operating costs. There will be giveaways of chemicals and t-shirts as well as a bag of sample products and literature to each member. I will also have pizza.

Jeff Moscoe

Western Regional Manager

Presidents Message

Have a great September!

Don't miss out on the Santa Summer Get A Way! This is a great event to relax, camp, and enjoy the lake with friends and family! Mark the date September 15th 16th and 17th. Please fill out the form and send it in!!

The next important date to know about is the October 28th 2017 the BORD for IPSSA will be holding their quarterly meetings in Sacramento. Some of the meetings are for question, answers, and suggestions from all of you "our membership". Remember this is all our organization and they need your input to help better service your needs! The location has not been set yet, but it will be here in Sacramento. We will keep you informed. Please make time to show up! It will benefit you and your company!!

'Til next time, keep it clear,

Scott Houseman
President

Education:

A Message from Monte...

Why do pipes break underground?

Pipes installed in the ground would seem to be secure and safe from damage, but there are many factors that can damage lines underground. The main cause of broken PVC pipes underground is due to stress on the pipes. When a pipe moves or shifts underground, or was installed at an improper angle, it causes stress on the pipe fittings. While PVC pipe fittings are thick and strong, they can only handle so much tension and have a breaking point. A fitting will generally crack at the weakest point, either starting with a hairline crack or initially splitting open. The pipes themselves do not usually crack unless one end of the line has no where to move, if it is encased in concrete or gunite. Exterior damage to pipes is also a factor, including concrete stakes, fence posts, shovels, and tree roots. Homeowners should always be mindful when landscaping or doing construction over underground plumbing lines. The idea behind professional leak detection is to pinpoint the leak to avoid expensive excavation damage to access the leak.
